DETAILED ACTION

Allowable Subject Matter

Claims 5-10 and 13 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 5, 6, 10 and 13.

Specifically regarding claims 5 and 10, Snyder (6389268) teaches the state of the art of apparatuses for viewing a display.

But, Snyder fails to explicitly teach wherein said mounting arm extension piece further comprises an affixation mating part, said affixation mating part for engaging with the portable radio communication station to engage together said mounting arm with the portable radio communication station, as claimed.

Specifically regarding claim 6, Snyder (6389268) teaches the state of the art of apparatuses for viewing a display.

But, Snyder fails to explicitly teach said mounting arm further comprises a clamping piece positioned at an end portion thereof, said clamping piece for engaging said optical lens in clamping engagement, thereby to support said optical lens in position therefrom, as claimed.

Specifically regarding claim 13, Snyder (6389268) teaches the state of the art of apparatuses for viewing a display.

But, Snyder fails to explicitly teach said first elongated mounting arm piece further comprises a hooking latch latchingly engageable with the portable radio communication station to engage said mounting arm together with the portable radio communication station, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
